Hemodynamic Monitoring: Evolving Technologies and Clinical Practice, 1e Mary E. Lough PhD RN CNS CCRN CNRN CCNS

An evidence-based guide to hemodynamic monitoring procedures and patient care, **Hemodynamic Monitoring: Evolving Technologies & Clinical Practice** describes invasive, non-invasive, and minimally invasive techniques in monitoring blood pressure and oxygen levels within the circulatory system. It provides a clear, illustrated discussion of the anatomy and physiology related to hemodynamics, explains the technologies involved in each measurement, and includes quick-reference tables of normal and abnormal values. Written by cardiovascular nursing expert Mary E. Lough, **Hemodynamic Monitoring** is a detailed, comprehensive text designed for critical care nurses and respiratory therapists.

- **Case Studies** in each clinical chapter include a patient scenario with assessment details, allowing you to envision real-life patient care and prepare for adverse outcomes or complications.
- **Coverage of patient safety** includes a discussion of important measures that will help you provide safe and effective patient-centered care.
- **UNIQUE! Coverage of patient comfort** includes a discussion of methods to increase patient comfort during invasive procedures.
- **Clinical Reasoning Pearls** provide practical advice from experts and describe how to implement a procedure or improve patient care.
- **A table of Important Values and Formulas** is located inside the back cover for quick and easy reference.
