Mark Newman, Albert-László Barabási, Duncan J. Watts

The Structure and Dynamics of Networks: (Princeton Studies in Complexity) Mark Newman, Albert-László Barabási, Duncan J. Watts

From the Internet to networks of friendship, disease transmission, and even terrorism, the concept--and the reality--of networks has come to pervade modern society. But what exactly is a network? What different types of networks are there? Why are they interesting, and what can they tell us? In recent years, scientists from a range of fields--including mathematics, physics, computer science, sociology, and biology--have been pursuing these questions and building a new "science of networks." This book brings together for the first time a set of seminal articles representing research from across these disciplines. It is an ideal sourcebook for the key research in this fast-growing field.

The book is organized into four sections, each preceded by an editors' introduction summarizing its contents and general theme. The first section sets the stage by discussing some of the historical antecedents of contemporary research in the area. From there the book moves to the empirical side of the science of networks before turning to the foundational modeling ideas that have been the focus of much subsequent activity. The book closes by taking the reader to the cutting edge of network science--the relationship between network structure and system dynamics. From network robustness to the spread of disease, this section offers a potpourri of topics on this rapidly expanding frontier of the new science.

From reader reviews:

John Barrow:

Book is usually written, printed, or outlined for everything. You can realize everything you want by a guide. Book has a different type. As it is known to us that book is important issue to bring us around the world. Beside that you can your reading skill was fluently. A reserve The Structure and Dynamics of Networks: (Princeton Studies in Complexity) will make you to be smarter. You can feel more confidence if you can know about anything. But some of you think in which open or reading some sort of book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you looking for best book or ideal book with you?

Brent Whitty:

The book The Structure and Dynamics of Networks: (Princeton Studies in Complexity) can give more knowledge and also the precise product information about everything you want. Why then must we leave a very important thing like a book The Structure and Dynamics of Networks: (Princeton Studies in Complexity)? A number of you have a different opinion about e-book. But one aim in which book can give many data for us. It is absolutely suitable. Right now, try to closer together with your book. Knowledge or info that you take for that, you can give for each other; you can share all of these. Book The Structure and Dynamics of Networks: (Princeton Studies in Complexity) has simple shape but you know: it has great and large function for you. You can seem the enormous world by start and read a publication. So it is very wonderful.

Theodore Dubose:

A lot of people always spent their particular free time to vacation or go to the outside with them family members or their friend. Do you know? Many a lot of people spent these people free time just watching TV, or playing video games all day long. If you wish to try to find a new activity honestly, that is look different you can read a new book. It is really fun in your case. If you enjoy the book that you just read you can spent the whole day to reading a publication. The book The Structure and Dynamics of Networks: (Princeton Studies in Complexity) it is quite good to read. There are a lot of individuals who recommended this book. We were holding enjoying reading this book. Should you did not have enough space to develop this book you can buy the actual e-book. You can m0ore very easily to read this book from the smart phone. The price is not too expensive but this book offers high quality.

Erica Northern:

Within this era which is the greater man or woman or who has ability in doing something more are more precious than other. Do you want to become certainly one of it? It is just simple solution to have that. What you are related is just spending your time very little but quite enough to possess a look at some books. On the list of books in the top record in your reading list is The Structure and Dynamics of Networks: (Princeton

Studies in Complexity). This book that is certainly qualified as The Hungry Inclines can get you closer in turning out to be precious person. By looking upward and review this publication you can get many advantages.
