We have come to know that our ability to survive and grow as a nation to a very large degree depends upon our scientific progress. Moreover, it is not enough simply to keep 1 abreast of the rest of the world in scientific matters. We must maintain our leadership. President Harry Truman spoke those words in 1950, in the aftermath of World War II and in the midst of the Cold War. Indeed, the scientific and engineering leadership of the United States and its allies in the twentieth century played key roles in the successful outcomes of both World War II and the Cold War, sparing the world the twin horrors of fascism and totalitarian communism, and fueling the economic prosperity that followed. Today, as the United States and its allies once again find themselves at war, President Truman's words ring as true as they did a half-century ago. The goal set out in the Truman Administration of maintaining leadership in science has remained the policy of the U. S. Government to this day: Dr. John Marburger, the Director of the Office of Science and Technology (OSTP) in the Executive Office of the President, made remarks to that effect during his 2 confirmation hearings in October 2001. The United States needs metrics for measuring its success in meeting this goal of maintaining leadership in science and technology. That is one of the reasons that the National Science Foundation (NSF) and many other agencies of the U. S.

From reader reviews:

Lula Barnes:

Here thing why this Brain-Computer Interfaces: An international assessment of research and development trends are different and reliable to be yours. First of all reading a book is good nevertheless it depends in the content of computer which is the content is as scrumptious as food or not. Brain-Computer Interfaces: An international assessment of research and development trends giving you information deeper as different ways, you can find any reserve out there but there is no book that similar with Brain-Computer Interfaces: An international assessment of research and development trends. It gives you thrill looking at journey, its open up your current eyes about the thing which happened in the world which is probably can be happened around you. It is easy to bring everywhere like in park your car, café, or even in your technique home by train. When you are having difficulties in bringing the published book maybe the form of Brain-Computer Interfaces: An international assessment of research and development trends in e-book can be your substitute.

Lillie Granado:

Nowadays reading books be than want or need but also work as a life style. This reading behavior give you lot of advantages. Associate programs you got of course the knowledge the particular information inside the book that improve your knowledge and information. The details you get based on what kind of reserve you read, if you want drive more knowledge just go with schooling books but if you want truly feel happy read one together with theme for entertaining such as comic or novel. The particular Brain-Computer Interfaces: An international assessment of research and development trends is kind of guide which is giving the reader unforeseen experience.

Elizabeth Blake:

This Brain-Computer Interfaces: An international assessment of research and development trends is great reserve for you because the content which is full of information for you who all always deal with world and still have to make decision every minute. That book reveal it facts accurately using great coordinate word or we can state no rambling sentences inside. So if you are read the idea hurriedly you can have whole data in it. Doesn't mean it only provides you with straight forward sentences but hard core information with splendid delivering sentences. Having Brain-Computer Interfaces: An international assessment of research and development trends in your hand like getting the world in your arm, details in it is not ridiculous one. We can say that no e-book that offer you world in ten or fifteen small right but this book already do that. So , this can be good reading book. Hi Mr. and Mrs. active do you still doubt this?

Harry Baxter:

As a college student exactly feel bored for you to reading. If their teacher questioned them to go to the library or to make summary for some book, they are complained. Just tiny students that has reading's internal

or real their leisure activity. They just do what the trainer want, like asked to the library. They go to at this time there but nothing reading critically. Any students feel that reading through is not important, boring in addition to can't see colorful images on there. Yeah, it is being complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Brain-Computer Interfaces: An international assessment of research and development trends can make you really feel more interested to read.
