**The Joy of Bootstrap: A smarter way to learn the world's most popular web framework** Alan Forbes

**B&W EDITION: How to build awesome browser applications that scale to mobile devices, even if you've never programmed before.**

Do you want to build browser applications that make people say "wow!" when they see it? Of course you do! I do too. How about apps that look great on a mobile device and size automatically for different screens? Yep, I want that too. :)

## **Experiment with the code on the Companion Web Site**

The book has tons of Bootstrap example source code which you can tweak and play with. It's all available at <http://joyofbootstrap.com/code.php> where you can even edit the code without downloading it. (Go ahead, try it now!) The book will walk you through all the hard code and explain how it works.

## **The Bootstrap book for you....**

I write books that are easy to read and easily digestible. I group the chapters into easy, logical concepts that work together but still stand on their own. Check out my writing style with a free sample here --> <http://joyofbootstrap.com/sample.pdf>

I write in a fun, conversational style that makes technical topics approachable for beginners. When it makes sense I build on early concepts to take you into progressively more advanced (cool) topics and exercises.

My books don't cover every function and nuance-- those books are too much like bricks for my taste-- instead my books are relatively thin with the goal to launch you into a subject as quickly as possible and empower you with the basics right away.

We'll also continue to use the successful metaphor of "Sam's Used Cars", a fictional web site that gives you a context in which to learn along. We'll take a plain and boring HTML website and bring it to life with Bootstrap.

## **Designed for everyone, everywhere.**

Bootstrap is a framework that makes front-end web development faster and easier. A couple of guys at Twitter invented it and later made it open source. Other people have joined in and it is now in it's third major release. Bootstrap 3 is good for people of all skill levels, devices of all shapes, and projects of all sizes.
