Transnational Private Governance and its Limits (Routledge/ECPR Studies in European Political Science)

This volume explores a variety of forms of transnational private governance where non-state actors cooperate across borders to establish rules and standards accepted as legitimate by other agents.

Transnational private governance is a core feature of the devolution of power that we observe in the global realm and that is bringing about new forms of authority. *Transnational Private Governance* provides theoretically and empirically informed insights into the interactions between states and non-state actors including domains beyond intergovernmental organizations, conventional non-governmental organizations, and multinational enterprises, covering a wide range of arrangements, from highly formal devolutions of power to lax and informal platforms of interaction between private actors. Contributing to the latest generation of globalization studies, the authors consider the relationship between states and markets as closely integrated and seek to broaden the scope of enquiry by including new patterns and agents of change on a transnational basis.

This book will be of great interest to researchers and students of political science, international political economy, economics, business studies, globalisation and law.
