## Encyclopedia of Ancient Natural Scientists: The Greek Tradition and its Many Heirs

*The Encyclopedia of Ancient Natural Scientists* is the first comprehensive English language work to provide a survey of all ancient natural science, from its beginnings through the end of Late Antiquity. A team of over 100 of the world's experts in the field have compiled this *Encyclopedia*, including entries which are not mentioned in any other reference work – resulting in a unique and hugely ambitious resource which will prove indispensable for anyone seeking the details of the history of ancient science.

Additional features include a *Glossary*, *Gazetteer*, and *Time-Line*. The Glossary explains many Greek (or Latin) terms difficult to translate, whilst the Gazetteer describes the many locales from which scientists came. The Time-Line shows the rapid rise in the practice of science in the 5<sup>th</sup> century BCE and rapid decline after Hadrian, due to the centralization of Roman power, with consequent loss of a context within which science could flourish.
