Privacy today is much debated as an individual's right against real or feared intrusions by the state as exemplified by proposed identity cards and surveillance measures in the United Kingdom. In contrast, invasions of privacy by private individuals or bodies tend to arouse less concern. This book fills the gap by looking at the horizontal application of human rights after *Douglas v. Hello*, *Campbell v. MGN*, and *Caroline von Hannover v. Germany*. It provides a conceptual and theoretical framework and also considers specific particularly-sensitive areas of law relating to privacy protection, such as intellectual property, employment, and media law. It provides comparative perspectives by relating Article 8 of the European Convention on Human Rights, which serves as a focal point, to UK, Dutch, German, and EC law. Several common threads are revealed running across jurisdictions and different areas of law and aspects of privacy. The most notable is the definition of privacy in terms of the autonomy of the individual, a notion associated with the liberal state in the classic sense, but now acquiring more content as a human right also linked to ideas of social justice.
