Reason, Truth and Reality Daniel Goldstick

Dan Goldstick's *Reason, Truth, and Reality* addresses two questions: what sort of world do we inhabit? and what moral obligations do we have? To answer the questions Goldstick mounts a bold contemporary defense of pre-Kantian rationalism. Basing consideration upon a characterization of reason in its deductive, inductive, and ethical functioning, he asks what must hold good for reason so characterized to be a dependable guide to truth.

The conclusions Goldstick draws are threefold. First of all, the argument points to continuous deterministic causality throughout space and time. In the second place, a case is made for universal impermanence. And thirdly, Goldstick claims to establish a basis for the right within a version of utilitarianism supporting the maximum long-term promotion of people's interests. The discussion takes in such traditional rationalist themes as aprioricity, conceivability, and antiscepticism, and such analytic topics as belief-and-desire, truthvaluelessness, and epistemic reliability.
