Scheduling Computer and Manufacturing Processes Jacek Blazewicz, Klaus H. Ecker, Erwin Pesch, Günter Schmidt, Jan Weglarz

Written in a clear and concise manner this book provides a theoretical and application oriented analysis of deterministic scheduling problems arising in computer and manufacturing environments. Various scheduling problems are discussed where different problem parameters such as task processing times, urgency weights, arrival times, deadlines, precedence constraints, and processor speed factor are involved. Polynomial and exponential time optimization algorithms as well as approximation and heuristic approaches are presented and discussed. Moreover, resource-constrained, imprecise computation, flexible flow shop and dynamic job shop scheduling, as well as flexible manufacturing systems, are considered. An excellent analysis based on real-world applications with plenty of examples.

From reader reviews:

Jack Lau:

Have you spare time to get a day? What do you do when you have more or little spare time? Sure, you can choose the suitable activity for spend your time. Any person spent their own spare time to take a stroll, shopping, or went to the Mall. How about open or maybe read a book called Scheduling Computer and Manufacturing Processes? Maybe it is to get best activity for you. You recognize beside you can spend your time together with your favorite's book, you can smarter than before. Do you agree with its opinion or you have other opinion?

Robert Young:

As people who live in the actual modest era should be up-date about what going on or data even knowledge to make these keep up with the era which can be always change and make progress. Some of you maybe can update themselves by reading through books. It is a good choice for you but the problems coming to you actually is you don't know which one you should start with. This Scheduling Computer and Manufacturing Processes is our recommendation to make you keep up with the world. Why, because book serves what you want and wish in this era.

Michael Joslyn:

Is it anyone who having spare time subsequently spend it whole day by means of watching television programs or just laying on the bed? Do you need something totally new? This Scheduling Computer and Manufacturing Processes can be the response, oh how comes? A book you know. You are and so out of date, spending your spare time by reading in this completely new era is common not a geek activity. So what these guides have than the others?

Eddie McCoy:

Some people said that they feel bored stiff when they reading a publication. They are directly felt it when they get a half parts of the book. You can choose often the book Scheduling Computer and Manufacturing Processes to make your reading is interesting. Your own personal skill of reading expertise is developing when you such as reading. Try to choose basic book to make you enjoy to see it and mingle the feeling about book and reading through especially. It is to be very first opinion for you to like to wide open a book and read it. Beside that the book Scheduling Computer and Manufacturing Processes can to be your new friend when you're truly feel alone and confuse using what must you're doing of their time.
