Earthrise: My Adventures as an Apollo 14 Astronaut Edgar Mitchell, Ellen Mahoney

On February 5, 1971, Edgar Mitchell jumped off the last rungs of a ladder connecting him to NASA's Antares spacecraft and landed with two feet on the Moon. Following the disastrous Apollo 13 mission, Mitchell was one of three astronauts to successfully complete the Apollo 14 journey to the Moon, though it wasn't without its own alarming moments.

In *Earthrise*, Edgar recalls his spectacular trip to the Moon and the life experiences that got him there, including his early days spent in Roswell, New Mexico, amid nuclear testing and the rumored UFO crash; his first solo airplane flight as a young teen; his time as a navy combat pilot; and becoming a NASA astronaut. With fascinating detail, Edgar describes what it was like to launch into space and land on the Moon, illuminating everything from the practical—eating, sleeping, and going to the bathroom in space—to the mystical, life-changing experience of gazing at Earth from afar.

With illuminating sidebars, transcripts of NASA recordings from the historic Apollo 14 mission, and extensive resources including lists of space-related websites, museums, organizations, films, and books, *Earthrise* is an invaluable addition to any space, astronomy, or science buff's bookshelf.
