## Search and Discovery: A Tribute to Albert Szent-Györgyi

Search and Discovery: Tribute to Albert Szent-Györgyi is dedicated to Albert Szent-Györgyi and stems from a Symposium, "Search and Discovery" held in his honor at Boston University School of Medicine. Szent-Györgyi, born in Budapest on September 16, 1893, established the Institute for Muscle Research at the Marine Biological Laboratory in 1947. His influence and impact extend beyond the confines of the laboratory. Throughout his life he was intensely concerned with the serious problems of mankind. He opposed Hitler and Stalin, and was outspoken against the involvement of the U.S. Government in the Vietnam War. Starting with recollections of Albert Szent-Györgyi by John T. Edsall of Harvard University, the remainder of the text is organized into six parts that cover the fields of Szent-Györgyi's major contributions and interests: metabolism, vitamin C, molecular mechanisms of muscle contraction, submolecular biology and cell growth, and cancer; the social interrelations of science were also not neglected. These milestones form the basis of this volume.
