Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften) Enrico Arbarello, Maurizio Cornalba, Phillip Griffiths, Joseph Daniel Harris

In recent years there has been enormous activity in the theory of algebraic curves. Many long-standing problems have been solved using the general techniques developed in algebraic geometry during the 1950's and 1960's. Additionally, unexpected and deep connections between algebraic curves and differential equations have been uncovered, and these in turn shed light on other classical problems in curve theory. It seems fair to say that the theory of algebraic curves looks completely different now from how it appeared 15 years ago; in particular, our current state of knowledge represents a significant advance beyond the legacy left by the classical geometers such as Noether, Castelnuovo, Enriques, and Severi. These books give a presentation of one of the central areas of this recent activity; namely, the study of linear series on both a fixed curve (Volume I) and on a variable curve (Volume II). Our goal is to give a comprehensive and self-contained account of the extrinsic geometry of algebraic curves, which in our opinion constitutes the main geometric core of the recent advances in curve theory. Along the way we shall, of course, discuss applications of the theory of linear series to a number of classical topics (e.g., the geometry of the Riemann theta divisor) as well as to some of the current research (e.g., the Kodaira dimension of the moduli space of curves).

From reader reviews:

Kathryn Sheffield:

Why don't make it to be your habit? Right now, try to prepare your time to do the important act, like looking for your favorite book and reading a e-book. Beside you can solve your condition; you can add your knowledge by the publication entitled Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften). Try to face the book Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften) as your close friend. It means that it can to get your friend when you sense alone and beside that course make you smarter than previously. Yeah, it is very fortunated to suit your needs. The book makes you more confidence because you can know everything by the book. So , we need to make new experience in addition to knowledge with this book.

Gene Kistler:

The particular book Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften) will bring that you the new experience of reading any book. The author style to explain the idea is very unique. Should you try to find new book to study, this book very suitable to you. The book Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften) is much recommended to you you just read. You can also get the e-book through the official web site, so you can more easily to read the book.

Helen Arnold:

Do you like reading a guide? Confuse to looking for your favorite book? Or your book ended up being rare? Why so many problem for the book? But any kind of people feel that they enjoy regarding reading. Some people likes examining, not only science book but in addition novel and Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften) or others sources were given understanding for you. After you know how the good a book, you feel would like to read more and more. Science publication was created for teacher as well as students especially. Those textbooks are helping them to add their knowledge. In some other case, beside science guide, any other book likes Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften) to make your spare time more colorful. Many types of book like this.

Eunice Nunn:

Reserve is one of source of understanding. We can add our information from it. Not only for students but in addition native or citizen need book to know the update information of year to be able to year. As we know those ebooks have many advantages. Beside many of us add our knowledge, also can bring us to around the world. By book Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften) we can have more advantage. Don't you to be creative people? To become creative person

must want to read a book. Merely choose the best book that suitable with your aim. Don't possibly be doubt to change your life by this book Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften). You can more pleasing than now.
