Wars are fought for two reasons and two reasons only: Religion and resources. Resources do not always mean oil or fishing grounds. Resources can also mean warehouses full of money and control over populations, human resources. Organized criminal activity nothing new and criminal gangs will be with us for many generations to come. But when criminal gangs rise to the power of nations, one has to question how they were able to obtain such a lofty goal.

Living and Dying in Mexico traces not only the history of the Mexican drug cartels but it tries to put the reader “on the ground” of one of the most vicious wars in history. These groups of mostly poorly educated men and women have managed to build organizations that can match the Mexican Army in fire power and still, somehow remain invisible. But when we trace the history we can begin to see connections between the US business community that go back generations and links that seem to support the theory of active US support of the cartels themselves.

We will probably never know all the facts of why this war was fought, why so many had to die. But we can start asking questions and Living and Dying in Mexico begins to ask those questions.
