Abiotic Stress Physiology of Horticultural Crops

Abiotic Stress Physiology of Horticultural Crops

This book brings together recent advances in the area of abiotic stress tolerance in various vegetables, fruit crops, plantation crops and tuber crops. The main challenges to improving the productivity of horticultural crops are the different types of abiotic stresses generally caused by climate change at the regional and global level. Heat, drought, cold and salinity are the major abiotic stresses that adversely affect growth and productivity and can trigger a series of morphological, physiological, biochemical and molecular changes in various horticultural crops.

To date, there are no books covering horticultural crop-specific abiotic stress tolerance mechanisms and their management. Addressing that gap, the book is divided into 2 sections, the first of which highlights recent advances in the general aspects of abiotic stress tolerance like the role of hormones, reactive oxygen species, seed treatments, molecular mechanisms of heat tolerance and heavy metal toxicity, while the second focuses on the abiotic stress tolerance mechanisms of various vegetables, fruit crops, plantation crops and tuber crops. It includes comprehensive discussions of fruit crops like mango, grapes, banana, litchi and arid zone fruits; vegetables crops like tomato, capsicum, onion and tuber crops; and plantation crops like coconut, areca nut, oil palm and black pepper. Among the strategies for plant stress survival, examples of both avoidance and tolerance relevant to particular crops are examined in detail, supported by selected comprehensive case studies of progress. As such, the book offers a valuable resource suited for scientists and graduate students working in the fields of crop improvement, genetic engineering, and the abiotic stress tolerance of horticultural crops.

From reader reviews:

Sybil Moore:

Why don't make it to be your habit? Right now, try to ready your time to do the important action, like looking for your favorite publication and reading a publication. Beside you can solve your short lived problem; you can add your knowledge by the book entitled Abiotic Stress Physiology of Horticultural Crops. Try to make the book Abiotic Stress Physiology of Horticultural Crops as your good friend. It means that it can to be your friend when you sense alone and beside regarding course make you smarter than previously. Yeah, it is very fortunated for yourself. The book makes you more confidence because you can know every little thing by the book. So , we need to make new experience along with knowledge with this book.

Frank Anderson:

Beside this kind of Abiotic Stress Physiology of Horticultural Crops in your phone, it may give you a way to get nearer to the new knowledge or information. The information and the knowledge you might got here is fresh from the oven so don't be worry if you feel like an previous people live in narrow community. It is good thing to have Abiotic Stress Physiology of Horticultural Crops because this book offers to your account readable information. Do you occasionally have book but you don't get what it's interesting features of. Oh come on, that will not happen if you have this within your hand. The Enjoyable agreement here cannot be questionable, just like treasuring beautiful island. Use you still want to miss the idea? Find this book and read it from now!

Eleanor Abney:

That publication can make you to feel relax. This kind of book Abiotic Stress Physiology of Horticultural Crops was vibrant and of course has pictures around. As we know that book Abiotic Stress Physiology of Horticultural Crops has many kinds or genre. Start from kids until teens. For example Naruto or Investigator Conan you can read and believe you are the character on there. Therefore , not at all of book are usually make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading that will.

Kim Adams:

Reading a e-book make you to get more knowledge from the jawhorse. You can take knowledge and information from your book. Book is published or printed or illustrated from each source that will filled update of news. In this modern era like currently, many ways to get information are available for anyone. From media social like newspaper, magazines, science guide, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just seeking the Abiotic Stress Physiology of Horticultural Crops when you required it?
