**Mapping Geomorphological Environments** Kosmas Pavlopoulos, Niki Evelpidou, Andreas Vassilopoulos

Mapping Geomorphological Environments is a highly descriptive textbook providing an excellent introduction to the latest methodologies for mapping geomorphological formations in a variety of different environments.

Its holistic approach seeks to provide a meaningful linkage between state of the art techniques for geomorphological mapping, including the latest innovations in geospatial applications, and advances in the understanding of the formation of geomorphological phenomena in a variety of settings and environments.

The book includes: - An introduction to the processes which form geomorphological formations and how to map them. - Case studies from a variety of environments with many examples of geomorphological maps. - In-depth descriptions of the latest tools and methodologies such as field sampling, GPS usage, 3–4D mapping, GIS analysis, digital image analysis, etc. - A list of the geomorphological characteristics per environment (e.g. coastal, fluvial, etc.) in the format of a geomorphological encyclopaedia, with pictures, maps and symbols.

It covers the entire workflow ranging from data collection, analysis, interpretation, and mapping.

## Acknowledgements

All authors would like to acknowledge the contribution of Dr. John W.M. Peterson, School of Computing Sciences, University of East Anglia, Norwich, UK, for corrections and improvement to the English text..

Università Telematica Guglielmo Marconi (UTGM) and ENEA acknowledge the collaboration of CUTGANA (Centro Universitario per la Tutela e la Gestione degli Ambienti Naturali e degli Agroecosistemi), Università di Catania, for the paper on "The Cyclops Islands".

IRMCo acknowledges the use of the Integrated Land and Water Information System (ILWIS), developed by ITC, the Netherlands, for the management and assessment of geographic information in a GIS environment. ILWIS functionality was employed for the paper on "The natural heritage of the Island of Gozo" and the paper on "The geomorphological cave features of Ghar il-Friefet".

IPB (Polytechnic Institute of Bragança) wishes to acknowledges all those colleagues, most of them also members of CIMO (Centre for Mountain Research), that contributed to the recently issued Management Plan of Montesinho Natural Park (PNM). Their hidden contribution to the articles concerning PNM is much acknowledged. A word in recognition of his endless and contagious enthusiasm towards Montesinho and to the Mountain domain, spread among us all in the IPB, is due to Professor Dionísio Gonçalves, the first Director, Coordinator and President of PNM, CIMO and IPB, respectively. The authors of the photos inserted in the articles concerning Montesinho are also much acknowledged for their contribution.

### **From reader reviews:**

#### **Cheryl Fenske:**

This Mapping Geomorphological Environments are generally reliable for you who want to be described as a successful person, why. The main reason of this Mapping Geomorphological Environments can be on the list of great books you must have will be giving you more than just simple examining food but feed you with information that maybe will shock your before knowledge. This book is actually handy, you can bring it everywhere you go and whenever your conditions both in e-book and printed ones. Beside that this Mapping Geomorphological Environments forcing you to have an enormous of experience such as rich vocabulary, giving you trial run of critical thinking that could it useful in your day action. So , let's have it and enjoy reading.

#### **Joyce Lynch:**

Within this era which is the greater individual or who has ability to do something more are more treasured than other. Do you want to become one of it? It is just simple solution to have that. What you should do is just spending your time very little but quite enough to get a look at some books. One of the books in the top collection in your reading list will be Mapping Geomorphological Environments. This book that is qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking right up and review this publication you can get many advantages.

#### **Mae Bushee:**

As a student exactly feel bored in order to reading. If their teacher expected them to go to the library or make summary for some reserve, they are complained. Just very little students that has reading's soul or real their hobby. They just do what the trainer want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that studying is not important, boring as well as can't see colorful photos on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this Mapping Geomorphological Environments can make you truly feel more interested to read.

#### **John Bergeron:**

Some individuals said that they feel uninterested when they reading a guide. They are directly felt it when they get a half elements of the book. You can choose the actual book Mapping Geomorphological Environments to make your own reading is interesting. Your current skill of reading skill is developing when you including reading. Try to choose basic book to make you enjoy to see it and mingle the opinion about book and examining especially. It is to be first opinion for you to like to open a book and study it. Beside that the book Mapping Geomorphological Environments can to be your friend when you're truly feel alone and confuse in doing what must you're doing of the time.
