Touchless Palmprint Recognition Systems (Advances in Information Security)

Angelo Genovese, Vincenzo Piuri, Fabio Scotti

Touchless Palmprint Recognition Systems (Advances in Information Security) Angelo Genovese, Vincenzo Piuri, Fabio Scotti

This book examines the context, motivation and current status of biometric systems based on the palmprint, with a specific focus on touchless and less-constrained systems. It covers new technologies in this rapidly evolving field and is one of the first comprehensive books on palmprint recognition systems.

It discusses the research literature and the most relevant industrial applications of palmprint biometrics, including the low-cost solutions based on webcams. The steps of biometric recognition are described in detail, including acquisition setups, algorithms, and evaluation procedures. Constraints and limitations of current palmprint recognition systems are analyzed and discussed.

The authors also introduce innovative methods for touchless and less-constrained palmprint recognition, with the aim to make palmprint biometrics easier to use in practical, daily-life applications, and overcome the typical constraints and limitations described.

Touchless Palmprint Recognition Systems targets professionals and researchers working in biometrics, image processing and three-dimensional reconstruction. Advanced-level students studying biometrics and computer science will also find this material valuable as a secondary text book or reference.

From reader reviews:

Joseph Chandler:

In other case, little persons like to read book Touchless Palmprint Recognition Systems (Advances in Information Security). You can choose the best book if you like reading a book. Providing we know about how is important the book Touchless Palmprint Recognition Systems (Advances in Information Security). You can add knowledge and of course you can around the world by the book. Absolutely right, mainly because from book you can know everything! From your country till foreign or abroad you can be known. About simple point until wonderful thing you can know that. In this era, we are able to open a book or even searching by internet device. It is called e-book. You need to use it when you feel weary to go to the library. Let's examine.

Tony Sanford:

The book Touchless Palmprint Recognition Systems (Advances in Information Security) can give more knowledge and also the precise product information about everything you want. So why must we leave a very important thing like a book Touchless Palmprint Recognition Systems (Advances in Information Security)? A few of you have a different opinion about publication. But one aim that book can give many details for us. It is absolutely suitable. Right now, try to closer with your book. Knowledge or information that you take for that, you can give for each other; you are able to share all of these. Book Touchless Palmprint Recognition Systems (Advances in Information Security) has simple shape however, you know: it has great and big function for you. You can seem the enormous world by start and read a book. So it is very wonderful.

Ruth Haddock:

Reading a book to get new life style in this season; every people loves to go through a book. When you go through a book you can get a lots of benefit. When you read publications, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what types of book that you have read. If you need to get information about your review, you can read education books, but if you want to entertain yourself look for a fiction books, these us novel, comics, and soon. The Touchless Palmprint Recognition Systems (Advances in Information Security) will give you new experience in examining a book.

George Hyler:

What is your hobby? Have you heard in which question when you got pupils? We believe that that problem was given by teacher with their students. Many kinds of hobby, All people has different hobby. Therefore you know that little person similar to reading or as reading become their hobby. You need to understand that reading is very important as well as book as to be the issue. Book is important thing to increase you knowledge, except your teacher or lecturer. You get good news or update in relation to something by book.

Many kinds of books that can you decide to try be your object. One of them is this Touchless Palmprint Recognition Systems (Advances in Information Security).
