Library Linked Data in the Cloud: OCLC's Experiments with New Models of Resource Description (Synthesis Lectures on the Semantic Web: Theory and Technology) Carol Jean Godby, Shenghui Wang, Jeffrey K. Mixter

This book describes OCLC's contributions to the transformation of the Internet from a web of documents to a Web of Data. The new Web is a growing ""cloud"" of interconnected resources that identify the things people want to know about when they approach the Internet with an information need. The linked data architecture has achieved critical mass just as it has become clear that library standards for resource description are nearing obsolescence. Working for the world's largest library cooperative, OCLC researchers have been active participants in the development of next-generation standards for library resource description. By engaging with an international community of library and Web standards experts, they have published some of the most widely used RDF datasets representing library collections and librarianship. This book focuses on the conceptual and technical challenges involved in publishing linked data derived from traditional library metadata. This transformation is a high priority because most searches for information start not in the library, nor even in a Web-accessible library catalog, but elsewhere on the Internet. Modeling data in a form that the broader Web understands will project the value of libraries into the Digital Information Age. The exposition is aimed at librarians, archivists, computer scientists, and other professionals interested in modeling bibliographic descriptions as linked data. It aims to achieve a balanced treatment of theory, technical detail, and practical application.

From reader reviews:

Linda Yohe:

As people who live in the modest era should be change about what going on or info even knowledge to make these people keep up with the era which is always change and move forward. Some of you maybe will certainly update themselves by looking at books. It is a good choice for you personally but the problems coming to anyone is you don't know what kind you should start with. This Library Linked Data in the Cloud: OCLC's Experiments with New Models of Resource Description (Synthesis Lectures on the Semantic Web: Theory and Technology) is our recommendation so you keep up with the world. Why, because book serves what you want and need in this era.

Houston Boynton:

The e-book with title Library Linked Data in the Cloud: OCLC's Experiments with New Models of Resource Description (Synthesis Lectures on the Semantic Web: Theory and Technology) has a lot of information that you can discover it. You can get a lot of profit after read this book. This specific book exist new understanding the information that exist in this publication represented the condition of the world right now. That is important to yo7u to be aware of how the improvement of the world. This book will bring you inside new era of the globalization. You can read the e-book on your own smart phone, so you can read that anywhere you want.

Colleen Greenwood:

Your reading 6th sense will not betray a person, why because this Library Linked Data in the Cloud: OCLC's Experiments with New Models of Resource Description (Synthesis Lectures on the Semantic Web: Theory and Technology) e-book written by well-known writer whose to say well how to make book which might be understand by anyone who else read the book. Written throughout good manner for you, leaking every ideas and composing skill only for eliminate your personal hunger then you still uncertainty Library Linked Data in the Cloud: OCLC's Experiments with New Models of Resource Description (Synthesis Lectures on the Semantic Web: Theory and Technology) as good book but not only by the cover but also with the content. This is one book that can break don't assess book by its include, so do you still needing an additional sixth sense to pick this kind of!? Oh come on your looking at sixth sense already said so why you have to listening to a different sixth sense.

Michael Spicer:

You can find this Library Linked Data in the Cloud: OCLC's Experiments with New Models of Resource Description (Synthesis Lectures on the Semantic Web: Theory and Technology) by visit the bookstore or Mall. Merely viewing or reviewing it could to be your solve difficulty if you get difficulties for the knowledge. Kinds of this publication are various. Not only by simply written or printed but also can you

enjoy this book by e-book. In the modern era like now, you just looking by your mobile phone and searching what your problem. Right now, choose your personal ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose correct ways for you.
